

# Experience The FordLogan Difference

“ We recently installed a standard FordLogan cage and because of the flexible design and easy installation it was a must for us. The Quick Ship Program allowed us to get the materials quickly and at an affordable price. The customer is happy and so are we!

—Boston ,MA

FordLogan is an Industry Leader with a 10-gauge wire mesh and triple-crimped diamond pattern. Our exclusive UNI-MESH™ woven wire design allows for full visibility and free circulation of air, light, and heat. It offers lasting protection for materials and personnel at an affordable price.

By using FordLogan standard stock, most projects ship within 48 hours or less—saving time and money. Standard stock is considered grey material 7', 8', and 10' heights. Also, FordLogan standard stock has the same bolt patterns shared across all heights allowing for easier installation.

FordLogan standard hinged doors are easily reversed in the field. The hinge doors are interchangeably designed to hinge left or right and open in or out making it easy to modify if needed. Several lock options are also available upon request.

FordLogan is versatile and can be used anywhere whether it's in a data center, driver's cages, or a walk-in cooler.
