

Specifications

Rails: 4" x 8" x 4" formed 7-gauge channel with 1/8" plate welded in channel to provide additional rigidity. Standard rail lengths are 4', 6', 8', 9' and 10'. Custom sizes also available.

Posts: 4" x 3/16" square wall tubing drilled to accept 3/4" hardware. Standard post heights are 21" for single tier and 42" for double tier.

Finish: Phosphate washed with a standard finish of **poly-ester powder coat** high quality yellow or 5 additional colors. Please consult factory for information on custom colors. Additional packaging charges may be required.

Physical barriers for work area protection.

Protect your plant equipment and pedestrian walkways with AisleGuard from SpaceGuard Products. AisleGuard uses heavy gauge structural rails that protect your employees and facilities from costly damage by forklifts and other mobile equipment.

Tested to withstand impacts of over 10,000 lbs at 4 mph, AisleGuard complies with safety standards for automated equipment.

• FOB IN
